

# Mykolaiv – a city without drinking water

On 13<sup>th</sup> April inhabitants of Mykolaiv were left without drinking water because of the Russian shellings from the temporarily occupied Kherson.

■ Areas where Ukraine has regained control

■ Russian-controlled territory and most recent Russian advances\*

The tap water now in is unsuitable for consumption. Drinking water is being delivered to inhabitants in barrels. However, it will shortly be impossible because of extremely low temperatures in winter. A young team from Mykolaiv is collecting money to drill two boreholes, each around 35 thousand EUR. In total they need around 70 thousand EUR.

## Our Achievements

Thanks to our team and the support of local activists we provide drinking water for people in Mykolaiv:

- 3 containers of 5000 liters each. This amount
  - Which are filled according to people's needs
  - Access to water is open
  - Containers are cared for around the clock

The uniqueness of our project is to deliver the 15 000 liters of water without littering the environment with plastic bottles and burning tons of gasoline while delivering water from another city.

**15** thousand liters Every day

**24** hours Constant care

**5** thousand liters Each one

## Our team

**Roman Pashkovsky**  
38 years old  
Photographer  
There is no period before or after the war. I didn't know anything about volunteering and how it works, but stress and hatred helped me to get it right. Have the desire to be involved in the victory.

**Egor Pogrebnyk**  
37 years old  
Unit Manager in Radioaktivellim production company.  
Now when the war started I only volunteer.  
I hope our people will not tire of helping each other as long as it will be necessary.

**Arthur Pantykin**  
24 years old  
Was born in Mykolaiv, in August 2016 moved to Kyiv to study. He is a Japanese and French translator by profession. With the beginning of a full-scale war, he began to volunteer.  
I do this because my country and people need help. So I have to do everything in my power.

Logistics manager, interpreter
