Getting edgy

Wann? 30.11.2015, 16.15-17.45 Uhr

Wo? Dorotheenstr. 65, Raum 5.57

Abstract

The talk demonstrates that in constructions where there is more than one phrase at a phasal edge, only the highest edge is available for movement and anaphor binding. This shows that only the outmost edge counts as the edge of a phase for the Phase-Impenetrability Condition. The talk also discusses a number of issues regarding the syntax and semantics of adjectives, possessors, and demonstratives.
